PROFILE

Frontend Developer with 4+ years building web applications and e-commerce solutions with React.js, Next.js, TypeScript, JavaScript, Shopify (Liquid), and WordPress. I build responsive, high performance UIs, integrate REST APIs, and handle dynamic data, usually owning a feature from the first line of code to the last. I have worked across custom Shopify storefronts, full WordPress builds, and React or Next.js apps, so I have learned to adapt fast and pick up a new codebase without needing much hand holding.

I have shipped 50+ projects so far, and on every one my focus is the same: make it fast, make it stable, and write code that still makes sense when I open it again months later. I care as much about what is happening under the hood as I do about how the final product looks.

PROFESSIONAL EXPERIENCE

Markloops

Senior Frontend Developer

10/2024 – Present
Islamabad, Pakistan

- Own end to end development of Shopify Plus storefronts, including custom sections, checkout customization, and metafields
- Build and maintain React.js interfaces for internal tooling used by the product and support teams
- Ship responsive, production ready features on a weekly release cycle alongside design and product, while auditing and refactoring legacy code for performance and long term maintainability

Node Agency

Frontend Developer

07/2023 – 10/2024
Islamabad, Pakistan

- Built 10+ production client projects using React.js, Next.js, and Shopify under agency deadlines
- Owned frontend architecture decisions on multi page Next.js apps, including routing, data fetching, and component structure
- Mentored two junior developers on React best practices, code reviews, and debugging
- Raised average Lighthouse scores from the 60s to 90+ across client sites by auditing Core Web Vitals

Uptek

Frontend Developer

05/2022 – 07/2023
Islamabad, Pakistan

- Built and maintained responsive UI components in React.js for internal tools and client facing web apps
- Developed and customized Shopify themes with Liquid, improving page speed and mobile usability
- Translated Figma mockups into pixel accurate, cross browser layouts in close collaboration with designers
